

## SUGDEN AUDIO KOPPURE Loudspeaker Cables

Sugden KOPPURE loudspeaker cables are handmade in Britain. Quality materials are used throughout to ensure high performance and reliability.

### Description

KOPPURE is a unique product. Every aspect of the design and manufacture is to Sugden Audio's exact specification. High purity copper (99.9%) is used for the conductor, avoiding contamination from aluminium or other rogue elements. The size of each conductor is 2.5mm and built up of forty individual strands that are straight and not twisted.

Each conductor is insulated with extra flexible sleeving and then fully cushioned in an anti-vibration surround. This type of construction offers easy manipulation when installing and relieves stress on your loudspeaker sockets.

### Connectors

The loudspeaker plugs are hand soldered to the conductors and this offers the best contact and most reliable connection. The 4mm banana plugs fitted to all KOPPURE cables use a powerful bar spring that ensures a perfect fit and maximum contact area for all types of loudspeaker sockets.

KOPPURE cables offer a perfect balance of performance and value and come with the reassurance of being designed and manufactured by Sugden Audio.

### Specification

Overall diameter	9.5mm
Conductor material	99.9% Pure Copper
Conductor Specification	2 x 2.5mm 40 strand straight wire
Insulation	Extra Flexible
Out Insulation Cushion	Extra Flexible

### Your Interconnect Cable has been fully tested and inspected

Visual Inspection  
Continuity  
Insulation  
Wiring Test
